## Album info:

Straight out from the lungs of hell the new album "SAKRILEG" will take you on a path into eternal damnation. 11 songs full of hate and scorn will bring you to your knees until your bones splinter, both lyrically and musically. Blastbeats alternating with D-Beat carnage until you are almost crushed by a doom - death – groove.

The band has managed to sound more varied than ever without denying the roots of their own past. Old school death metal is the rule that's for sure and yet the band isn't afraid to incorporate other elements.

Almost 5 years after the predecessor Atomwinter are returning with a new frontman and their new album "SAKRILEG" stronger than ever!

The sonic hellride is provided by sound engineer Torsten Sauerbrey, and the result is without a doubt the most brutal production ATOMWINTER could ever come up with!
